

Workshop on

“Introduction to Operation, Inspection, Maintenance, Alteration and Re-construction of Above Ground Storage Tanks based on API -653” 3-Days Session

About Us

We are the training providers and deals in Technical, HSEQ, Management and Soft Skills Training.

We have highly knowledgeable and experienced local & foreign subject matter experts. Our team is highly focused and provides the best support as per your requirements and needs.

We provide a platform from where you can add value in your teams. We are highly fascinated on the development of your Technical and Management Teams.

We can provide on-site and classroom training.

About Trainer

Mr. Ahmad has graduated in Mechanical Engineering and Master of Computer Science. He is an API authorized / certified for Above Ground Storage Tanks (API-653), Pressure Vessels (API-510), Damage Mechanisms Affecting Fixed Equipment in the Refining Industry (API-571), Welding and Metallurgy (API-577) and Risk Based Inspection (API-580). He has various NDT levels.

He has good knowledge of conventional and advanced NDT techniques including intrusive and non-intrusive. He has earned more than

He is an experienced technical auditor / trainer in the field of Asset Integrity Management System, RBI, Storage Tanks, Pressure Vessels, Plant Piping, Pipeline, Pressure Relieving devices, control valves and utility plant equipment including steam turbines etc.

He has conducted various in-house and public courses abroad and within Pakistan for the companies like PETRONAS, ADCO, BP, PPL, Shell Pakistan, Shell Oman, Shell Dubai, PSO, Attock Refinery and etc. He is actively involved in the Internal audit, document review, technical procedures review and inspection of steel fabrication, API 5L line pipe, piping, pipeline, Boilers, HRSG, Pressure Vessels, Heat Exchangers, Storage Tanks, Steel structure and equipment for cement plants, power plants and sugar mills etc. He has been conducting internal audits of the company. He is an approved Sector Expert by European Quality Certification Institute for the Engineering sector.

Course Description:

A comprehensive 03 days course providing vital technical information that you can immediately apply to manage, evaluate and correct problems of your above ground storage tanks.

Course Objective:

Worldwide public opinion is increasing the pressure to protect the environment. Operating companies throughout the world are becoming more aware of the expenses and penalties for spills of chemicals, petroleum products, etc. These operating companies are turning their attention to storage tanks to assure that they are being properly constructed, maintained, inspected, repaired and operated.

Course Overview:

A critical look at:

- Information on API standard requirements, procedures, materials and maintenance.
- Above ground storage tank technology on tank testing, inspection and construction
- Advanced technology survey of site assessment and corrective action procedures
- Good practices for constructing and maintaining tanks to meet operating standards and practices.

Day 1

- Scope of API 653
- Some Important Definitions
- Types of Above Ground Storage Tanks
- Reasons for Inspection and causes of deterioration
- Suitability for Service
- Brittle Fracture Considerations
- Small Quiz

Day 2

- Inspection
- Materials
- Design considerations for re-constructed tanks
- Tank repair and alteration
- Dismantling and re-construction
- Examination and Testing
- Marking and Record Keeping
- Small Quiz

Day 3

- Radiographic method
- Magnetic Particle Examination
- Ultrasonic Examination
- Liquid Penetrant Examination
- Visual Examination
- Vacuum Testing
- MFL / Acoustic Emission Testing
- Small Quiz
